Art Unit: 3641

1. Claims 3 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 depends from itself. In claim 6, lines 1-2, the phrase "the means for securing the locking block" lacks an antecedent.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 13, 18, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Fuchs et al. (059 B1).

Fuchs et al. (059 B1) disclose a semi-automatic pistol comprising:

- | | |
|---|-----------------------|
| a) a frame; | 1 |
| b) a barrel; | 21 |
| c) a slide; | 20 |
| d) a locking block; | 10 |
| e) a front end, rear end, and side walls; | see fig. 1 |
| f) guide rails; | 13 |
| g) front and rear edges of said guide rail; | 13 (see fig. 1) |
| h) aligned transverse bores as means for securing; | 14, 15 |
| i) an accepted pin; | 16 |
| j) transverse ribs as means for reducing relative movement; and | 11 (both sides of 10) |

Art Unit: 3641

k) engaged grooves. 12

4. Claims 13, 18, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Schmitter et al. (169).

Schmitter et al. (169) disclose a semi-automatic pistol comprising:

- a) a frame; 30
- b) a barrel; 12
- c) a slide; 24
- d) a locking block; 70, 120, 140
- e) a front end, rear end, and side walls; 70, 120, 140
- f) guide rails; 80
- g) front and rear edges of said guide rail; 80 (fig. 1)
- h) aligned transverse bores as means for securing; 100, adjacent opening
in 30
- i) an accepted pin; 20
- j) transverse ribs as means for reducing relative movement; and 110 or 140 or 124
- k) engaged grooves. inner surface of 30

5. Applicant's arguments with regard to Schmitter et al. are directed to structural features contained only in claims indicated as being allowable and not to structural features of the claims currently at issue (i.e. claims 13, 18, and 20).

6. Claims 1-2, 5, 8-12, and 19 allowed.

Art Unit: 3641

7. Claims 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
8. Claim 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
9. Claim 3 is too indefinite in its current form to make a determination regarding patentable subject matter.
10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
